Gabriel Porto

Campina Grande, PB | estudosgabriel07@gmail.com | linkedin.com/in/gabriel-porto-5092293b3 | github.com/devgabrielporto07

PROFESSIONAL SUMMARY

Computer Science undergraduate interested in back-end development and cybersecurity, building a strong foundation through Java, Python, and C coursework and hands-on projects. Brings practical experience in command-line programming, introductory relational data modeling, UI/UX prototyping in Figma, version control, technical documentation, and customer-facing operations.

EDUCATION

UNINASSAU - Campina Grande, Brazil 2026-Present
B.Sc. in Computer Science | Currently in the 2nd semester; expected graduation: February 2029.

EXPERIENCE

Customer Service & Monitoring Attendant | ACS Portaria Aug-Nov 2026

- Monitored alarm and camera feeds, communicated incident and delivery notices, and handled phone and WhatsApp inquiries concurrently.

SELECTED PROJECTS

PCEDUC Extension Project (In Progress) | UNINASSAU

- Product requirements documentation (PRD), project documentation, Figma prototyping, Git/GitHub repository organization, and demo site files as part of a university extension team.

Java CLI Calculator (In Progress) | Java github.com/devgabrielporto07/Calculadora-Java-CLI

- Building a command-line calculator while strengthening Java fundamentals and problem-solving through coursework.

Client Registration System | Python github.com/devgabrielporto07/Sistema-Cadastro-Clientes

- Implemented the command-line registration logic and local text-file data handling; practiced core programming logic in a collaborative project.

Market Simulation | Python github.com/devgabrielporto07/Sistema-de-Mercado-Cadastramento-Compras

- Contributed to a first-semester command-line project covering product registration, shopping-cart flow, checkout, and change calculation.

Relational Database Project (In Progress) | BRModelo

- Built the relational data model for a group database project using BRModelo.

Pharmacy App UI/UX Design | Figma

- Co-built the Figma UI/UX design in a team project and handled repository versioning on the main branch.

Drudge Report Redesign | Figma

- Redesigned interface and screen flow based on Nielsen's 10 usability heuristics, proposing a new layout.

C/C++ Coursework Exercises | C, C++

- Solved exercises from basic to advanced assigned in class, plus beecrowd problems to train programming logic and Git.

SELECTED TRAINING & CERTIFICATIONS

- Introduction to the Java Development Market - DIO + Globant (2026)
- Python 3 - Mundo 1 (40 hours) - Curso em Video (2026)
- Python Journey (8 hours) - Hashtag Treinamentos (2026) | Microsoft Power BI - Hashtag Treinamentos (2026)
- Data Immersion with Python II (4 hours) - Alura (2026) | Front-End Immersion with AI - Alura (2026)
- HTML and CSS: Practicing HTML/CSS (8 hours) - Alura (2026) | Dev with Gemini Immersion - Alura (2024)
- PIQ Technology - IFP (Professional Qualification Incentive Program) | ENTEC Technology Event (20 hours) - UNINASSAU (2026)

TECHNICAL SKILLS

Programming: Java (foundational; current focus), C/C++ (coursework), Python (fundamentals), JavaScript (fundamentals)
Web and Data: HTML5, CSS3, Bootstrap (introductory); SQL (beginner queries); relational data modeling with BRModelo; Power BI (introductory)
Tools: Git/GitHub (basic version control), VS Code, IntelliJ, Figma, Trello, Jira

LANGUAGES

Portuguese (native) | English (basic; understands simple texts and slower speech)
